## 360iQ Application

**Release Date: Q4 2025**

### Summary:

In Q4, we introduced new enhancements that make 360iQ more intuitive, customizable, and efficient across web, mobile, and reporting experiences. We added flexible video viewing options, expanded email personalization, delivered deeper SmartReport (Account Analysis Report) insights, and rolled out several mobile app improvements to streamline everyday workflows. These updates give your teams faster access to information, better control over communication, and more meaningful analytics to support operational excellence.

### Key Highlights:

- **Camera Aspect Ratio**  
Enjoy a more flexible viewing experience with the new Aspect Ratio toggle in the video panel. Choose between Stretch, Zoom, or Fit to control how your video looks - whether you want maximum detail or a perfect fit.
- **Email Customization**  
Personalize your SmartAudit emails like never before. You can now customize titles and body content to match your communication style and even create rule-based messages based on

selected metrics - making your emails more relevant and impactful. For more information or to get started, please contact your DTiQ representative

- **SmartReport (Account Analysis Report) Updates**

For Account Analysis Report clients, the SmartAudit Insight Dashboard now includes Account Analysis Report data in the overview section. We've also added a dedicated section for conducted account analysis reports, featuring detailed metrics and insights to help you make informed decisions and strengthen operational compliance. For more information or to get started, please contact your DTiQ representative

- **Mobile App Improvements**

We've made navigation faster and more intuitive with three powerful enhancements:

- **Home Screen Customization:** Set your favorite screen as the default for faster access to the features you use most.
- **Recent Locations View:** Quickly access your most recently viewed locations for instant video checks.
- **Recent Locations Widget:** Add a widget to your device's home screen for one-tap access to locations and videos - even without opening the app.
